

Semester I — Syllabus

BSDS Archive

Statistics I

- Population, sample, data types
- Frequency distributions
- Central tendency & dispersion
- Moments, skewness, kurtosis
- Correlation & simple linear regression

Mathematics I

- Sets & functions
- Sequences, series, limits
- Continuity & differentiability
- Riemann integration
- Vector spaces & linear algebra

Probability I

- Sample spaces & axioms
- Random variables
- Standard distributions
- Expectation & variance
- Moment generating functions

Economics I

- Demand & supply
- Elasticity
- Consumer behaviour
- Production & cost
- Market structures
